

## **VIRTUAL ACADEMIC EXCHANGE PROGRAM 2021-A UNIVERSITY OF GUADALAJARA**

The internationalization strategy of Higher Education Institutions (HEI) is constantly evolving. Now, new technologies contribute to finding new development opportunities for students, expanding the scope and impact of exchanges, as well as collaboration between HEI.

The current challenges in the face of the health emergency drive us to reinvent ourselves and adapt in various aspects, especially educational institutions that value the international dimension as a fundamental axis for institutional and training development.

In order to promote intercultural and digital skills, as well as access to learning - without the economic, health or physical aspects being an obstacle - the University of Guadalajara (UdeG) offers, based on our various academic collaboration agreements, a virtual academic exchange program.

We are glad to provide you with information about the “Virtual Academic Exchange Program (PEAV)” that the UdeG offers (for the semester 2021-A).

### **Characteristics of a virtual exchange program in the PEAV**

PEAV is a program that allows a student from a partner institution enroll in one or more online credit courses offered by our institution (Courses catalogue PEAV 2021-A).

In the PEAV program, all partner institutions with a collaboration agreement will enjoy exemption from the cost of registration.

### **Courses Catalogue that are part of the PEAV**

We have a new courses portfolio for the first semester of 2021 to enroll the students from partner institutions will study and collaborate virtually with colleagues in Mexico.

Due to the nature of virtual learning, not all courses can be offered in a virtual way or are suitable for hosting international students in a virtual exchange program.

Please consult the options to participate in the PEAV at:
